NeuroScience Survey ID #1606753291

Requested for:
Name: **Andrew Ross**
Sex: **unspecified**
Age: **66**
State: **Wyoming**

Stress Evalution

Your Score 12

Your overall stress level is **12**, which indicates your stress level is **healthy**.

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Stress Product Recommendations

Alpha GABA

Ingredients to promote calm during times of anxiousness while supporting a healthy response to stress, day or night*

- ✓ Contains ingredients to promote calm during times of anxiousness while supporting a healthy stress response, day or night
- Alpha GABA was recommended because you indicated you are perceiving elevated levels of stress and may fairly or very often feel nervous or stressed
- Alpha GABA provides a multi-faceted approach to stress management with ingredients to reduce symptoms of anxiousness while supporting a healthy stress response[33,34]

Suggested use:
Take 2-3 capsules up to two times daily or as directed by your healthcare provider. Do not exceed suggested use.

Calm CP

Decreases cortisol levels and provides ingredients important for calm, sleep, and management of blood sugar*

- ✓ Decreases cortisol levels and provides ingredients important for calm, sleep, and management of blood sugar*
- ✓ Calm CP was recommended because you indicated you are perceiving elevated levels of stress
- ✓ Cortisol secretion follows a marked circadian rhythm and increases in response to stress through activation of the HPA axis35

Suggested use:
Take 2 capsules one to two times daily or as directed by your healthcare provider. Do not exceed suggested use.
If you are pregnant or nursing, consult your healthcare provider before use.

Foundational Evalution

★★★

Fruits & Vegetables

You report consuming 3 to 5 servings per day

★★★★

Essential Fatty Acids

You report consuming 3 or more servings per week

★

Fiber

You report consuming 0 to 1 servings per day

★

Protein

You report consuming 0 to 1 servings per day

★

Calcium

You report consuming 0 to 2 servings per day

★★★★

Exercise

You reported that you are very active and/or workout almost daily

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Foundational Recommendation

Multivitamin

USDA recommends consuming 1-2 cups of whole fruits and 1-3 cups of vegetables per day [15]

Consider increasing your daily intake of whole fruits and vegetables

Fish Oil

The American Heart Association recommends eating 2 servings of omega-3 rich foods weekly [15]

You are taking in the recommended amount of omega-3 rich foods

Fiber

The American Heart Association recommends eating 25 grams of fiber per day[17]

Increase your daily intake of fiber-containing foods and consider adding a fiber supplement to your daily regimen

Protein

The American Heart Association recommends eating 8-9 servings of protein per week[18]
%}

Increase your daily intake of high protein foods and consider adding a protein supplement to your daily regimen

Calcium

The USDA recommends consuming 2-3 cups of dairy foods daily for adequate calcium intake[15]

Increase your daily intake of dairy food and consider adding a calcium supplement to your daily regimen

Exercise

- ✓ Lorem ipsum dolor sit amet, consectetur adipisicing elit
- + Ut enim ad minim veniam, quis nostrud exercitation ullamc
- * Quis nostrud exercitation ullamco laboris nisi.
- ⊘ Laboris nisi ut aliquip ex ea commodo consequat.

Lifestyle Suggestions

Sleep Hygiene

- **Blue Light**: Reducing blue light exposure 2 hours before bed has been shown to improve sleep quality and total sleep time[19]
- **Exercise**: Regular exercise may improve sleep and is best completed several hours before bed time[20]
- **Caffeine**: Limit caffeine intake several hours before bedtime as it can be disruptive on sleep[20]
- **Nicotine**: Nicotine is associated with sleep issues, contact your healthcare provider for further guidance on the use of nicotine products[20]
- **Alcohol**: While alcohol has been shown to help individuals fall asleep, it may prevent deep sleep and increase awakenings in the middle of the night[20]
- **Manage Stress**: Practice calming and relaxing techniques before bed as stress may contribute to difficulty sleeping[20]
- **Regular Sleep Times**: Practice going to bed at regular times to promote stable sleep and wakefulness[20]

Stress Hygiene

- **Cognitive-Behavioral Management**: Cognitive-behavioral stress management techniques such as relaxation techniques, cognitive restructuring, psychoeducation, and coping skills have been shown to be very effective at reducing stress[38]
- **Yoga:** Yoga has been shown to greatly reduce short-term anxiousness, perceived stress, and psychological distress[38]
- **Mindfulness**: Mindfulness as defined as nonjudgmental present-moment awareness that has been shown to significantly reduce stress when practiced daily[38]
- **Music Therapy**: Guided music therapy while listening to music meaningful to oneself has been shown to significantly reduce feelings of anxiousness[38]

Fatigue Hygiene

- **Physical Activity:** Physical activity has been shown to help improve feelings of general fatigue[26]
- **Hydration**: Adequate hydration has been found to reduce feelings of fatigue[27]
- **Sleep**: Go to bed at regular times and get 7-8.5 hours of sleep per night[28]
- **Balanced Diet:** A balanced diet with whole grains high in fiber, polyphenol-rich vegetables, and omega-3 fatty acids may improve fatigue symptoms[29]
- **Positive Outlook**: A positive outlook has been correlated with better stress management and reduced fatigue[30]
