Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Foundational Evalution

Fruits & Vegetables

You report consuming 0 to 2 servings per day

Essential Fatty Acids

You report consuming 0 to 1 servings per week

Fiber

You report consuming 0 to 1 servings per day

Protein

You report consuming 0 to 1 servings per day

Calcium

You report consuming 0 to 2 servings per day

Exercise

You reported that you are not very active and/or do not workout

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Foundational Recommendation

Multivitamin

USDA recommends consuming 1-2 cups of whole fruits and 1-3 cups of vegetables per day[15]

Increase your daily intake of whole fruits and vegetables and consider adding a multivitamin to your daily regimen

Fish Oil

The American Heart Association recommends eating 2 servings of omega-3 rich foods weekly[15]

Increase your weekly intake of omega-3 rich food and consider adding a fish oil supplement to your daily regimen

Fiber

The American Heart Association recommends eating 25 grams of fiber per day[17]

Increase your daily intake of fiber-containing foods and consider adding a fiber supplement to your daily regimen

Protein

The American Heart Association recommends eating 8-9 servings of protein per week[18] %}

Increase your daily intake of high protein foods and consider adding a protein supplement to your daily regimen

Calcium

The USDA recommends consuming 2-3 cups of dairy foods daily for adequate calcium intake[15]

Increase your daily intake of dairy food and consider adding a calcium supplement to your daily regimen

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Lifestyle Suggestions

Sleep Hygiene

- **Blue Light**: Reducing blue light exposure 2 hours before bed has been shown to improve sleep quality and total sleep time[19]
- **Exercise**: Regular exercise may improve sleep and is best completed several hours before bed time[20]
- **Caffeine**: Limit caffeine intake several hours before bedtime as it can be disruptive on sleep[20]
- **Nicotine**: Nicotine is associated with sleep issues, contact your healthcare provider for further guidance on the use of nicotine products[20]
- **Alcohol**: While alcohol has been shown to help individuals fall asleep, it may prevent deep sleep and increase awakenings in the middle of the night[20]
- **Manage Stress**: Practice calming and relaxing techniques before bed as stress may contribute to difficulty sleeping[20]
- **Regular Sleep Times**: Practice going to bed at regular times to promote stable sleep and wakefulness[20]
