NeuroScience Survey ID #1607015763

Requested for:
Name: **Amanda Sobottka**
Sex: **female**
Age: **55**
State: **British Columbia**

Sleep Evaluation
Sleep Score: 17

Sleep area	Description	Rating
Self-Rated Sleep Quality	This how you rate your sleep quality	★
Ability to Fall Asleep	This is your body's ability to fall asleep	★
Ability to Stay Asleep	This is your body's ability to stay asleep through the night	★★
Temperature Regulation	This is your body's ability to regulate temperature at night	★★★
Nighttime Discomfort	This is how you rate your nighttime discomfort	★
Daytime Fatigue	This is how you rate your sleepiness during the day	★
Daytime Motivation	This is how you rate your motivation and energy to accomplish tasks during the day	★★

Sleep Product Recommendations

Alpha GABA PM

Researched blend of botanicals and 400 mg of L-theanine shown to induce calming brain waves and naturally improve sleep during times of stress*

- ✓ Researched blend of botanicals and 400 mg of L-theanine shown to induce calming brain waves, so you can turn your brain "off", and naturally improve sleep during times of stress*
- ✓ Alpha GABA PM was recommended because you indicated your sleep quality was very poor2
- ✓ Alpha GABA PM has been shown to significantly improve self-reported sleep quality2

Suggested use:
Take 1-2 capsules at bedtime or as directed by your healthcare provider. Do not exceed suggested use.

CBD

- Cannabidiol (CBD) is a phytocannabinoid derived from hemp (Cannabis sativa) known to affect the body's endocannabinoid system which aids in supporting a healthy immune response and promoting feelings of calm[14*]
- The endocannabinoid system is important for regulatory functions in the body including supporting a healthy immune response and promoting calm[14]
- CBD was recommended because you indicated you experienced discomfort at night

Foundational Evalution

★★★

Fruits & Vegetables

You report consuming 3 to 5 servings per day

★

Essential Fatty Acids

You report consuming 0 to 1 servings per week

★★★★

Fiber

You report consuming 3 or more servings per day

★★★

Protein

You report consuming 2 to 3 servings per day

★★★★

Calcium

You report consuming 4 or more servings per day

★★★

Exercise

You reported that you are fairly active and/or workout occasionally

Foundational Recommendation

Multivitamin

USDA recommends consuming 1-2 cups of whole fruits and 1-3 cups of vegetables per day[15]

Consider increasing your daily intake of whole fruits and vegetables

Fish Oil

The American Heart Association recommends eating 2 servings of omega-3 rich foods weekly[15]

Increase your weekly intake of omega-3 rich food and consider adding a fish oil supplement to your daily regimen

Fiber

The American Heart Association recommends eating 25 grams of fiber per day[17]

You are taking in the recommended amount of fiber

Protein

The American Heart Association recommends eating 8-9 servings of protein per week[18]

Consider increasing your daily intake of high protein foods

Calcium

The USDA recommends consuming 2-3 cups of dairy foods daily for adequate calcium intake[15]

You are taking in the recommended amount of calcium

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Lifestyle Suggestions

Sleep Hygiene

- **Blue Light**: Reducing blue light exposure 2 hours before bed has been shown to improve sleep quality and total sleep time[19]
- **Exercise**: Regular exercise may improve sleep and is best completed several hours before bed time[20]
- **Caffeine**: Limit caffeine intake several hours before bedtime as it can be disruptive on sleep[20]
- **Nicotine**: Nicotine is associated with sleep issues, contact your healthcare provider for further guidance on the use of nicotine products[20]
- **Alcohol**: While alcohol has been shown to help individuals fall asleep, it may prevent deep sleep and increase awakenings in the middle of the night[20]
- **Manage Stress**: Practice calming and relaxing techniques before bed as stress may contribute to difficulty sleeping[20]
- **Regular Sleep Times**: Practice going to bed at regular times to promote stable sleep and wakefulness[20]
