Foundational Evalution

★

Fruits & Vegetables

You report consuming 0 to 2 servings per day

★★★

Essential Fatty Acids

You report consuming 2 to 3 servings per week

★★★★

Fiber

You report consuming 3 or more servings per day

★★★

Protein

You report consuming 2 to 3 servings per day

★★★

Calcium

You report consuming 3 to 4 servings per day

★★★★

Exercise

You reported that you are very active and/or workout almost daily

This product is not intended to diagnose, treat, cure, or prevent any disease.

Foundational Recommendation

Multivitamin

USDA recommends consuming 1-2 cups of whole fruits and 1-3 cups of vegetables per day[15]

Increase your daily intake of whole fruits and vegetables and consider adding a multivitamin to your daily regimen

Fish Oil

The American Heart Association recommends eating 2 servings of omega-3 rich foods weekly[15]

Consider increasing your weekly intake of omega-3 rich food

Fiber

The American Heart Association recommends eating 25 grams of fiber per day[17]

You are taking in the recommended amount of fiber

Protein

The American Heart Association recommends eating 8-9 servings of protein per week[18]

Consider increasing your daily intake of high protein foods

Calcium

The USDA recommends consuming 2-3 cups of dairy foods daily for adequate calcium intake[15]

Consider increasing your daily intake of calcium
