NeuroScience Survey ID #1610994664

Requested for:
Name: **Jane Doe**
Sex: **female**
Age: **49**
State: **Massachusetts**

Fatigue Evalution

Your Score 55

Your overall fatigue level is **55**, which indicates your fatigue level is **poor**.

Fatigue area	Description	Rating
General Fatigue	General fatigue measures your overall fatigue and decreased ability to function[21]	★★★★
Physical Fatigue	Physical fatigue measures physical sensations related to your fatigue[21]	★★★★
Activity Fatigue	Activity measures the influence of physical and psychological factors on your level of activity[21]	★
Motivation Fatigue	Motivation measures your lack of motivation for starting activity[21]	★
Mental Fatigue	Mental fatigue measures your cognitive functioning and difficulty concentrating or focusing[21]	★

Fatigue Product Recommendations

Alpha GABA PM

Researched blend of botanicals and 400 mg of L-theanine shown to induce calming brain waves and naturally improve sleep during times of stress*

- ✓ Researched blend of botanicals and 400 mg of L-theanine shown to induce calming brain waves and naturally improve sleep during times of stress*
- ✓ Sleep quality has been shown to be inversely correlated with fatigue[25]
- ✓ Alpha GABA PM was recommended because you indicated you struggle with general fatigue

Suggested use:
Take 1-2 capsules at bedtime or as directed by your healthcare provider. Do not exceed suggested use.

Balance D

Contains ingredients important for the synthesis of dopamine, a catecholamine important for positive affect, mood, cognition, and craving control*

- ✓ Contains ingredients important for the body's production of dopamine, a catacholamine important for positive affect, mood, cognition, and craving control*
- ✓ Dopamine has been implicated as one of the key modulators in behavioral motivation[24]
- ✓ Balance D was recommended because you indicated you struggle with motivation

Suggested use:
Take 1-2 capsules one to two times daily or as directed by your healthcare provider.
If you are pregnant or nursing, consult your healthcare provider before use.

Foundational Evalution

★★★

Fruits & Vegetables

You report consuming 3 to 5 servings per day

★★★

Essential Fatty Acids

You report consuming 2 to 3 servings per week

★★★★

Fiber

You report consuming 3 or more servings per day

★★★

Protein

You report consuming 2 to 3 servings per day

★★★★

Calcium

You report consuming 4 or more servings per day

★★★★

Exercise

You reported that you are very active and/or workout almost daily

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Foundational Recommendation

Multivitamin

USDA recommends consuming 1-2 cups of whole fruits and 1-3 cups of vegetables per day[15]

Consider increasing your daily intake of whole fruits and vegetables

Fish Oil

The American Heart Association recommends eating 2 servings of omega-3 rich foods weekly[15]

Consider increasing your weekly intake of omega-3 rich food

Fiber

The American Heart Association recommends eating 25 grams of fiber per day[17]

You are taking in the recommended amount of fiber

Protein

The American Heart Association recommends eating 8-9 servings of protein per week[18]

Consider increasing your daily intake of high protein foods

Calcium

The USDA recommends consuming 2-3 cups of dairy foods daily for adequate calcium intake[15]

You are taking in the recommended amount of calcium

Lifestyle Suggestions

Fatigue Hygiene

- **Physical Activity:** Physical activity has been shown to help improve feelings of general fatigue[26]
- **Hydration**: Adequate hydration has been found to reduce feelings of fatigue[27]
- **Sleep**: Go to bed at regular times and get 7 - 8.5 hours of sleep per night[28]
- **Balanced Diet:** A balanced diet with whole grains high in fiber, polyphenol-rich vegetables, and omega-3 fatty acids may improve fatigue symptoms[29]
- **Positive Outlook**: A positive outlook has been correlated with better stress management and reduced fatigue[30]

***These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.**
