NeuroScience Survey ID #1634536303

Requested for:
Name: **Barbara Shanahan**
Sex: **female**
Age: **83**
State: **Wisconsin**

Stress Evalution

Your Score 20

Your overall stress level is **20**, which indicates your stress level is **elevated**.

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Stress Product Recommendations

Calm G

Contains a blend of ingredients important for regulating glutamate activity, stress-reduction, metabolic health, and mitochondrial function*

- Contains a blend of ingredients important for regulating glutamate activity, stress-reduction, metabolic health, and mitochondrial health*
- Calm G was recommended because you indicated you are perceiving elevated levels of stress and may suffer from inadequate magnesium intake
- Calm G combines 120 mg of magnesium with other vitamins, minerals, and amino acids important for a healthy stress response

Suggested use:
Take 1-2 capsules three to four times daily or as directed by your healthcare provider.
If you are pregnant or nursing, consult your healthcare provider before use.

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Foundational Evaluation

★

Fruits & Vegetables

You report consuming 0 to 2 servings per day

★

Essential Fatty Acids

You report consuming 0 to 1 servings per week

★

Fiber

You report consuming 0 to 1 servings per day

★★★

Protein

You report consuming 2 to 3 servings per day

★

Calcium

You report consuming 0 to 2 servings per day

★

Exercise

You reported that you are not very active and/or do not workout

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Foundational Recommendation

Multivitamin

USDA recommends consuming 1-2 cups of whole fruits and 1-3 cups of vegetables per day[15]

Increase your daily intake of whole fruits and vegetables and consider adding a multivitamin to your daily regimen

Fish Oil

The American Heart Association recommends eating 2 servings of omega-3 rich foods weekly[15]

Increase your weekly intake of omega-3 rich food and consider adding a fish oil supplement to your daily regimen

Fiber

The American Heart Association recommends eating 25 grams of fiber per day[17]

Increase your daily intake of fiber-containing foods and consider adding a fiber supplement to your daily regimen

Protein

The American Heart Association recommends eating 8-9 servings of protein per week[18]

Consider increasing your daily intake of high protein foods

Calcium

The USDA recommends consuming 2-3 cups of calcium-rich foods daily for adequate intake[15]

Increase your daily intake of calcium rich foods and consider adding a calcium supplement to your daily regimen

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Lifestyle Suggestions

Stress Hygiene

- **Cognitive-Behavioral Management**: Cognitive-behavioral stress management techniques such as relaxation techniques, cognitive restructuring, psychoeducation, and coping skills have been shown to be very effective at reducing stress[38]
- **Yoga:** Yoga has been shown to greatly reduce short-term anxiousness, perceived stress, and psychological distress[38]
- **Mindfulness**: Mindfulness as defined as nonjudgmental present-moment awareness that has been shown to significantly reduce stress when practiced daily[38]
- **Music Therapy**: Guided music therapy while listening to music meaningful to oneself has been shown to significantly reduce feelings of anxiousness[38]

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.
