Sleep Product Recommendations

TravaCor

Contains a blend of ingredients shown to improve mood and reduce stress*

- ✓ Contains a blend of ingredients shown to improve mood and reduce stress*
- ✓ TravaCor was recommended because you indicated your ability to sleep through the night was poor or very poor
- ✓ TravaCor contains ingredients used in the body's creation of serotonin4*
- ✓ Serotonin is a neurotransmitter important for inducing sleep5

Suggested use:
Take 1-3 capsules one to two times daily or as directed by your healthcare provider.
If you are pregnant or nursing, consult your healthcare provider before use.

CBD

- Cannabidiol (CBD) is a phytocannabinoid derived from hemp (*Cannabis sativa*) known to affect the body's endocannabinoid system which aids in supporting a healthy immune response and promoting feelings of calm[14*]
- The endocannabinoid system is important for regulatory functions in the body including supporting a healthy immune response and promoting calm[14]
- CBD was recommended because you indicated you experienced discomfort at night

Foundational Evaluation

★★★

Fruits & Vegetables

You report consuming 3 to 5 servings per day

★

Essential Fatty Acids

You report consuming 0 to 1 servings per week

★★★

Fiber

You report consuming 2 to 3 servings per day

★★★★

Protein

You report consuming 3 or more servings per day

★★★

Calcium

You report consuming 3 to 4 servings per day

★★★

Exercise

You reported that you are fairly active and/or workout occasionally

Foundational Recommendation

Multivitamin

USDA recommends consuming 1-2 cups of whole fruits and 1-3 cups of vegetables per day[15]

Consider increasing your daily intake of whole fruits and vegetables

Fish Oil

The American Heart Association recommends eating 2 servings of omega-3 rich foods weekly[15]

Increase your weekly intake of omega-3 rich food and consider adding a fish oil supplement to your daily regimen

Fiber

The American Heart Association recommends eating 25 grams of fiber per day[17]

Consider increasing your daily intake of fiber-containing foods

Protein

The American Heart Association recommends eating 8-9 servings of protein per week[18]

You are taking in the recommended amount of protein

Calcium

The USDA recommends consuming 2-3 cups of calcium-rich foods daily for adequate intake[15]

Consider increasing your daily intake of calcium

Lifestyle Suggestions

Sleep Hygiene

- **Blue Light**: Reducing blue light exposure 2 hours before bed has been shown to improve sleep quality and total sleep time[19]
- **Exercise**: Regular exercise may improve sleep and is best completed several hours before bedtime[20]
- **Caffeine**: Limit caffeine intake several hours before bedtime as it can be disruptive on sleep[20]
- **Nicotine**: Nicotine is associated with sleep issues, contact your healthcare provider for further guidance on the use of nicotine products[20]
- **Alcohol**: While alcohol has been shown to help individuals fall asleep, it may prevent deep sleep and increase awakenings in the middle of the night[20]
- **Manage Stress**: Practice calming and relaxing techniques before bed as stress may contribute to difficulty sleeping[20]
- **Regular Sleep Times**: Practice going to bed at regular times to promote stable sleep and wakefulness[20]
