NeuroScience Survey ID #1614728370

Requested for:
Name: **Krystal Reyes**
Sex: **female**
Age: **31**
State: **CA**

Stress Evalution

Your Score

31

Your overall stress level is **31**, which indicates your stress level is **high**.

***These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Stress Product Recommendations

TravaCor

Contains a blend of ingredients shown to improve mood and reduce stress*

- ✓ Contains a blend of ingredients shown to improve mood and reduce stress*
- ✓ TravaCor was recommended beause you indicated you are perceiving elevated levels of stress and reported feelings of upset or anger
- ✓ Low levels of serotonin have been correlated with feelings of upset or anger. TravaCor contains 5-HTP and B-vitamins important for the synthesis of serotonin in the body[4,32]

Suggested use:
Take 1-3 capsules one to two times daily or as directed by your healthcare provider.
If you are pregnant or nursing, consult your healthcare provider before use.

***These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Calm CP

Decreases cortisol levels and provides ingredients important for calm, sleep, and management of blood sugar*

- Decreases cortisol levels and provides ingredients important for calm, sleep, and management of blood sugar*
- Calm CP was recommended because you indicated you are perceiving elevated levels of stress
- Cortisol secretion follows a marked circadian rhythm and increases in response to stress through activation of the HPA axis[35]

Suggested use:
Take 2 capsules one to two times daily or as directed by your healthcare provider. Do not exceed suggested use.
If you are pregnant or nursing, consult your healthcare provider before use.

***These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.**

Foundational Evalution

Fruits & Vegetables

You report consuming servings per day

Essential Fatty Acids

You report consuming servings per week

Fiber

You report consuming servings per day

Protein

You report consuming servings per day

Calcium

You report consuming servings per day

Exercise

***These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Foundational Recommendation

Multivitamin

USDA recommends consuming 1-2 cups of whole fruits and 1-3 cups of vegetables per day[15]

Fish Oil

The American Heart Association recommends eating 2 servings of omega-3 rich foods weekly[15]

Fiber

The American Heart Association recommends eating 25 grams of fiber per day[17]

Protein

The American Heart Association recommends eating 8-9 servings of protein per week[18]

Calcium

The USDA recommends consuming 2-3 cups of calcium-rich foods daily for adequate intake[15]

***These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Lifestyle Suggestions

Stress Hygiene

- **Cognitive-Behavioral Management**: Cognitive-behavioral stress management techniques such as relaxation techniques, cognitive restructuring, psychoeducation, and coping skills have been shown to be very effective at reducing stress[38]
- **Yoga:** Yoga has been shown to greatly reduce short-term anxiousness, perceived stress, and psychological distress[38]
- **Mindfulness**: Mindfulness as defined as nonjudgmental present-moment awareness that has been shown to significantly reduce stress when practiced daily[38]
- **Music Therapy**: Guided music therapy while listening to music meaningful to oneself has been shown to significantly reduce feelings of anxiousness[38]

***These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.
