Fatigue Product Recommendations

Alpha GABA PM

Researched blend of botanicals and 400 mg of L-theanine shown to induce calming brain waves and naturally improve sleep during times of stress*

- ✓ Researched blend of botanicals and 400 mg of L-theanine shown to induce calming brain waves and naturally improve sleep during times of stress*
- ✓ Sleep quality has been shown to be inversely correlated with fatigue[25]
- ✓ Alpha GABA PM was recommended because you indicated you struggle with general fatigue

Suggested use:
Take 1-2 capsules at bedtime or as directed by your healthcare provider. Do not exceed suggested use.
If you are pregnant or nursing, consult your healthcare provider before use.

Foundational Evalution

Fruits & Vegetables

You report consuming servings per day

Essential Fatty Acids

You report consuming servings per week

Fiber

You report consuming servings per day

Protein

You report consuming servings per day

Calcium

You report consuming servings per day

Exercise

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Foundational Recommendation

Multivitamin

USDA recommends consuming 1-2 cups of whole fruits and 1-3 cups of vegetables per day[15]

Fish Oil

The American Heart Association recommends eating 2 servings of omega-3 rich foods weekly[15]

Fiber

The American Heart Association recommends eating 25 grams of fiber per day[17]

Protein

The American Heart Association recommends eating 8-9 servings of protein per week[18]

Calcium

The USDA recommends consuming 2-3 cups of calcium-rich foods daily for adequate intake[15]

***These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Lifestyle Suggestions

Fatigue Hygiene

- **Physical Activity:** Physical activity has been shown to help improve feelings of general fatigue[26]
- **Hydration**: Adequate hydration has been found to reduce feelings of fatigue[27]
- **Sleep**: Go to bed at regular times and get 7 - 8.5 hours of sleep per night[28]
- **Balanced Diet:** A balanced diet with whole grains high in fiber, polyphenol-rich vegetables, and omega-3 fatty acids may improve fatigue symptoms[29]
- **Positive Outlook**: A positive outlook has been correlated with better stress management and reduced fatigue[30]

***These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.
