Sleep Product Recommendations

Kavinace OS

Target the cellular consequences of sleeplessness with a formulation proven to significantly improve both sleep onset and efficiency after the first dose*

- ✓ Blend of ingredients proven to significantly improve both falling asleep and effectiveness after the first dose1*
- ✓ Recommended because you indicated your body's ability to fall asleep is very poor1

Suggested use:
Take 2 capsules at bedtime or as directed by your healthcare provider. Do not exceed suggested use.
If you are pregnant or nursing, consult your healthcare provider before use.

Black Cohosh

- Black cohosh is a botanical that targets body systems important for temperature regulation[11,12*]
- Black Black cohosh has been shown to significantly reduce night sweats, hot flashes, and flushes and improve sleep quality by reducing wakefulness after falling asleep[13]*
- Black cohosh was recommended because you indicated you experienced hot flashes (vasomotor symptoms) at night[13]

Foundational Evalution

★

Fruits & Vegetables

You report consuming 0 to 2 servings per day

★

Essential Fatty Acids

You report consuming 0 to 1 servings per week

★★★

Fiber

You report consuming 2 to 3 servings per day

★

Protein

You report consuming 0 to 1 servings per day

★

Calcium

You report consuming 0 to 2 servings per day

★

Exercise

You reported that you are somewhat active and/or workout rarely

Foundational Recommendation

Multivitamin

USDA recommends consuming 1-2 cups of whole fruits and 1-3 cups of vegetables per day[15]

Increase your daily intake of whole fruits and vegetables and consider adding a multivitamin to your daily regimen

Fish Oil

The American Heart Association recommends eating 2 servings of omega-3 rich foods weekly[15]

Increase your weekly intake of omega-3 rich food and consider adding a fish oil supplement to your daily regimen

Fiber

The American Heart Association recommends eating 25 grams of fiber per day[17]

Consider increasing your daily intake of fiber-containing foods

Protein

The American Heart Association recommends eating 8-9 servings of protein per week[18]
%}

Increase your daily intake of high protein foods and consider adding a protein supplement to your daily regimen

Calcium

The USDA recommends consuming 2-3 cups of calcium-rich foods daily for adequate intake[15]

Increase your daily intake of calcium rich foods and consider adding a calcium supplement to your daily regimen

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Lifestyle Suggestions

Sleep Hygiene

- **Blue Light**: Reducing blue light exposure 2 hours before bed has been shown to improve sleep quality and total sleep time[19]
- **Exercise**: Regular exercise may improve sleep and is best completed several hours before bedtime[20]
- **Caffeine**: Limit caffeine intake several hours before bedtime as it can be disruptive on sleep[20]
- **Nicotine**: Nicotine is associated with sleep issues, contact your healthcare provider for further guidance on the use of nicotine products[20]
- **Alcohol**: While alcohol has been shown to help individuals fall asleep, it may prevent deep sleep and increase awakenings in the middle of the night[20]
- **Manage Stress**: Practice calming and relaxing techniques before bed as stress may contribute to difficulty sleeping[20]
- **Regular Sleep Times**: Practice going to bed at regular times to promote stable sleep and wakefulness[20]
