NeuroScience Survey ID #1678722585

Requested for:

Name: **Mary Gossett King**
Sex: **female**
Age: **70**
State: **Georgia**

Your Score29

Your overall stress level is **29**, which indicates your stress level is **elevated**.

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

SeroTrex

Chewable tablets with ingredients important for mood and reducing stress*

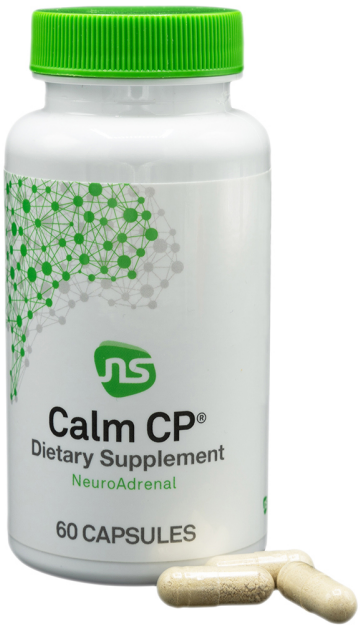
- Chewable tablets with ingredients for mood and reducing stress*
- SeroTrex was recommended in replacement of TravaCor because you indicated the inability to swallow capsules or tablets
- L-theanine and 5-HTP are amino acids that act as glutamate receptor antagonists and support serotonin synthesis4,36*

Suggested use:
Chew 1-2 tablets up to twice daily or as directed by your healthcare provider. Do not exceed suggested use.

If you are pregnant or nursing, consult your healthcare provider before use.

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.



Calm CP

Decreases cortisol levels and provides ingredients important for calm, sleep, and management of blood sugar*

- Decreases cortisol levels and provides ingredients important for calm, sleep, and management of blood sugar*
- Calm CP was recommended because you indicated you are perceiving elevated levels of stress
- Cortisol secretion follows a marked circadian rhythm and increases in response to stress through activation of the HPA axis35

Suggested use:
Take 2 capsules one to two times daily or as directed by your healthcare provider. Do not exceed suggested use.

If you are pregnant or nursing, consult your healthcare provider before use.

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.
