NeuroScience Survey ID #1627056260

Requested for:
Name: **Maile Shimoda**
Sex: **female**
Age: **38**
State: **California**

Stress Evalution

Your Score

33

Your overall stress level is **33**, which indicates your stress level is **high**.

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Stress Product Recommendations

Alpha GABA

Ingredients to promote calm during times of anxiousness while supporting a healthy response to stress, day or night*

- ✓ Contains ingredients to promote calm during times of anxiousness while supporting a healthy stress response, day or night
- Alpha GABA was recommended because you indicated you are perceiving elevated levels of stress and may fairly or very often feel nervous or stressed
- Alpha GABA provides a multi-faceted approach to stress management with ingredients to reduce symptoms of anxiousness while supporting a healthy stress response[33,34]

Suggested use:
Take 2-3 capsules up to two times daily or as directed by your healthcare provider. Do not exceed suggested use.
If you are pregnant or nursing, consult your healthcare provider before use.

Suggested use:
Take 2-3 capsules up to two times daily or as directed by your healthcare provider. Do not exceed suggested use.
If you are pregnant or nursing, consult your healthcare provider before use.

NeuroBiota

Combination of two uniquely designed blends of shelf-stable probiotics important for the gut-brain axis, improvement of mood, neurotransmitter synthesis, and balancing the immune response*

- ✓ Combination of two uniquely designed blends of shelf-stable probiotics important for the gut-brain axis, improvement in mood, neurotransmitter synthesis, and balancing the immune response
- ✓ NeuroBiota was recommended because you indicated you experience digestive symptoms three or more times per week

Suggested use:
Take 1 capsule daily or as directed by your healthcare provider. Do not exceed suggested use.
If you are pregnant or nursing, consult your healthcare provider before use.

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

ExcitaPlus

Contains non-glandular ingredients important for adrenal health and reducing stress-induced fatigue.* Provides over three times the L-tyrosine and six times the Rhodiola per capsule compared to AdreCor.

- ✓ Contains non-glandular ingredients important for adrenal health and reducing stress-induced fatigue*
- ✓ ExcitaPlus was recommended because you indicated you may experience cognitive issues and difficulty handling personal problems, coping with things you have to do, keeping on top of things
- ✓ Contains ingredients to support the synthesis of dopamine, a neurotransmitter implicated in motivation and Rhodiola, a botanical shown to reduce mental fatigue23,24

Suggested use:
Take 1-2 capsules one to two times daily or as directed by your healthcare provider. Do not exceed suggested use.
If you are pregnant or nursing, consult your healthcare provider before use.
