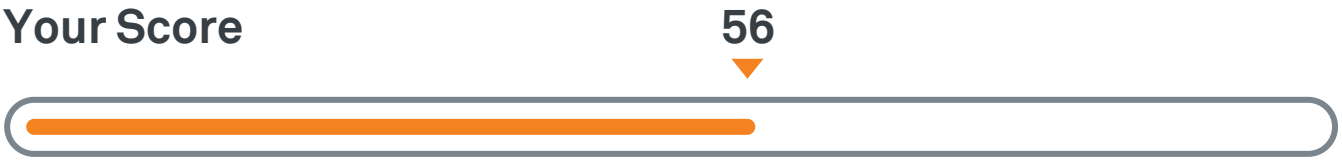
NeuroScience Survey ID #1751462582

Requested for:
Name: **Nicole Lewis, ND**
Sex: **female**
Age: **35**
State: **Washington**

Fatigue Evalution

Your Score 56



Your overall fatigue level is **56**, which indicates your fatigue level is **poor**.

Fatigue area	Description	Rating
General Fatigue	General fatigue measures your overall fatigue and decreased ability to function[21]	★
Physical Fatigue	Physical fatigue measures physical sensations related to your fatigue[21]	★★
Activity Fatigue	Activity measures the influence of physical and psychological factors on your level of activity[21]	★★★
Motivation Fatigue	Motivation measures your lack of motivation for starting activity[21]	★★★

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Mental Fatigue	Mental fatigue measures your cognitive functioning and difficulty concentrating or focusing[21]	★★★

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Fatigue Product Recommendations

Alpha GABA PM

Data supported botanical blend with 400mg of L-theanine shown to induce healthy calming brain waves and naturally improve balanced sleep during times of stress*

- ✓ Researched blend of botanicals and 400 mg of L-theanine shown to induce calming brain waves and naturally improve sleep during times of stress*
- ✓ Sleep quality has been shown to be inversely correlated with fatigue25
- ✓ Alpha GABA PM was recommended because you indicated you struggle with general fatigue

Suggested use:
Take 1-2 capsules at bedtime or as directed by your healthcare provider.
If you are pregnant or nursing, consult your healthcare provider before use.

NAD

- NAD is central to the body's metabolism, mitochondrial health, and cellular energy production
- NAD was recommended because you indicated you struggle with physical fatigue
