NeuroScience Survey ID #1627501002

Requested for:
Name: **Hayat Yousef**
Sex: **female**
Age: **31**
State: **California**

Fatigue Evalution

Your Score

67

Your overall fatigue level is **67**, which indicates your fatigue level is **poor.**

Fatigue area	Description	Rating
General Fatigue	General fatigue measures your overall fatigue and decreased ability to function[21]	★
Physical Fatigue	Physical fatigue measures physical sensations related to your fatigue[21]	★★★
Activity Fatigue	Activity measures the influence of physical and psychological factors on your level of activity[21]	★★
Motivation Fatigue	Motivation measures your lack of motivation for starting activity[21]	★★
Mental Fatigue	Mental fatigue measures your cognitive functioning and difficulty concentrating or focusing[21]	★

Fatigue Product Recommendations

Alpha GABA PM

Researched blend of botanicals and 400 mg of L-theanine shown to induce calming brain waves and naturally improve sleep during times of stress*

- ✓ Researched blend of botanicals and 400 mg of L-theanine shown to induce calming brain waves and naturally improve sleep during times of stress*
- ✓ Sleep quality has been shown to be inversely correlated with fatigue25
- ✓ Alpha GABA PM was recommended because you indicated you struggle with general fatigue

Suggested use:
Take 1-2 capsules at bedtime or as directed by your healthcare provider. Do not exceed suggested use.
If you are pregnant or nursing, consult your healthcare provider before use.

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

ExcitaPlus

Contains non-glandular ingredients important for adrenal health and reducing stress-induced fatigue.* Provides over three times the L-tyrosine and six times the Rhodiola per capsule compared to AdreCor.

- ✓ Contains ingredients important for adrenal health and reducing stress-induced fatigue*
- ✓ Contains ingredients to support the body's production of dopamine, a neurotransmitter implicated in motivation and Rhodiola, a botanical shown to reduce mental fatigue22,23
- ✓ ExcitaPlus was recommended because you indicated your struggle with general fatigue, mental fatigue, and motivation

Suggested use:
Take 1-2 capsules one to two times daily or as directed by your healthcare provider. Do not exceed suggested use.
If you are pregnant or nursing, consult your healthcare provider before use.

NAD

- NAD is central to the body's metabolism, mitochondrial health, and cellular energy production
- NAD was recommended because you indicated you struggle with physical fatigue
