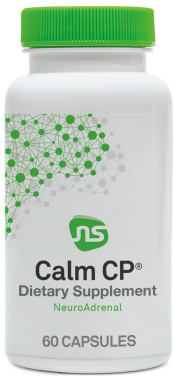
Sleep Product Recommendations

TravaCor

Contains a blend of ingredients shown to improve mood and reduce stress*

- Contains a blend of ingredients shown to improve mood and reduce stress*
- TravaCor was recommended because you indicated your ability to sleep through the night was poor or very poor
- TravaCor contains ingredients used in the body's creation of serotonin4*
- Serotonin is a neurotransmitter important for inducing sleep5

Suggested use:
Take 1-3 capsules one to two times daily or as directed by your healthcare provider.
If you are pregnant or nursing, consult your healthcare provider before use.



Calm CP

Decreases cortisol levels and provides ingredients important for calm, sleep, and management of blood sugar*

- Decreases cortisol levels and provides ingredients important for calm, sleep, and management of blood sugar9*
- Elevated cortisol has been associated with difficulty sleeping10
- Calm CP is a proven blend of ingredients that has been shown to decrease cortisol levels in as little as 5 days9

Suggested use:
Take 2 capsules one to two times daily or as directed by your healthcare provider. Do not exceed suggested use.
If you are pregnant or nursing, consult your healthcare provider before use.
