NeuroScience Survey ID #1657210286

Requested for:
Name: **Nicole W**
Sex: **female**
Age: **55**
State: **Maryland**

Stress Evalution

Your Score

24

Your overall stress level is **24**, which indicates your stress level is **elevated**.

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Stress Product Recommendations

SeroTrex

Chewable tablets with ingredients important for mood and reducing stress*

- Chewable tablets with ingredients for mood and reducing stress*
- SeroTrex was recommended in replacement of TravaCor because you indicated the inability to swallow capsules or tablets
- L-theanine and 5-HTP are amino acids that act as glutamate receptor antagonists and support serotonin synthesis4,36*

Suggested use:
Chew 1-2 tablets up to twice daily or as directed by your healthcare provider. Do not exceed suggested use.
If you are pregnant or nursing, consult your healthcare provider before use.

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Foundational Evaluation

★★★

Fruits & Vegetables

You report consuming 3 to 5 servings per day

★★★★

Essential Fatty Acids

You report consuming 3 or more servings per week

★★★

Fiber

You report consuming 2 to 3 servings per day

★★★★

Protein

You report consuming 3 or more servings per day

★★★★

Calcium

You report consuming 4 or more servings per day

★★★

Exercise

You reported that you are fairly active and/or workout occasionally

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Foundational Recommendation

Multivitamin

USDA recommends consuming 1-2 cups of whole fruits and 1-3 cups of vegetables per day[15]

Consider increasing your daily intake of whole fruits and vegetables

Fish Oil

The American Heart Association recommends eating 2 servings of omega-3 rich foods weekly[15]

You are taking in the recommended amount of omega-3 rich foods

Fiber

The American Heart Association recommends eating 25 grams of fiber per day[17]

Consider increasing your daily intake of fiber-containing foods

Protein

The American Heart Association recommends eating 8-9 servings of protein per week[18]

You are taking in the recommended amount of protein

Calcium

The USDA recommends consuming 2-3 cups of calcium-rich foods daily for adequate intake[15]

You are taking in the recommended amount of calcium

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Lifestyle Suggestions

Stress Hygiene

- **Cognitive-Behavioral Management**: Cognitive-behavioral stress management techniques such as relaxation techniques, cognitive restructuring, psychoeducation, and coping skills have been shown to be very effective at reducing stress[38]
- **Yoga:** Yoga has been shown to greatly reduce short-term anxiousness, perceived stress, and psychological distress[38]
- **Mindfulness**: Mindfulness as defined as nonjudgmental present-moment awareness that has been shown to significantly reduce stress when practiced daily[38]
- **Music Therapy**: Guided music therapy while listening to music meaningful to oneself has been shown to significantly reduce feelings of anxiousness[38]

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.
