NeuroScience Survey ID #1677098413

Requested for:

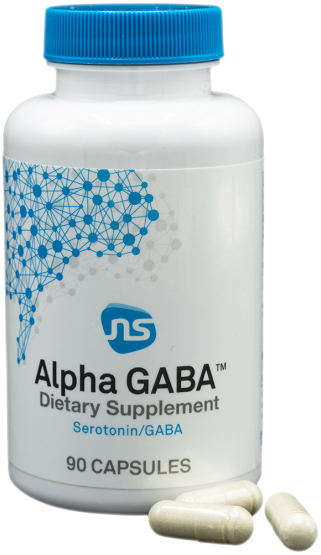
Name: **Gillian Paddock**
Sex: **female**
Age: **18**
State: **Massachusetts**

Your Score28

Your overall stress level is **28**, which indicates your stress level is **elevated**.

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.



Alpha GABA

Ingredients to promote calm during times of anxiousness while supporting a healthy response to stress, day or night*

- Contains ingredients to promote calm during times of anxiousness while supporting a healthy stress response, day or night
- Alpha GABA was recommended because you indicated you are perceiving elevated levels of stress and may fairly or very often feel nervous or stressed
- Alpha GABA provides a multi-faceted approach to stress management with ingredients to reduce symptoms of anxiousness while supporting a healthy stress response[33,34]

Suggested use:
Take 2-3 capsules up to two times daily or as directed by your healthcare provider. Do not exceed suggested use.

If you are pregnant or nursing, consult your healthcare provider before use.

Fruits & Vegetables

You report consuming 3 to 5 servings per day

Essential Fatty Acids

You report consuming 0 to 1 servings per week

Fiber

You report consuming 3 or more servings per day

Protein

You report consuming 2 to 3 servings per day

Calcium

You report consuming 0 to 2 servings per day

Exercise

You reported that you are fairly active and/or workout occasionally

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Multivitamin

USDA recommends consuming 1-2 cups of whole fruits and 1-3 cups of vegetables per day[15]

Consider increasing your daily intake of whole fruits and vegetables

Fish Oil

The American Heart Association recommends eating 2 servings of omega-3 rich foods weekly[15]

Increase your weekly intake of omega-3 rich food and consider adding a fish oil supplement to your daily regimen

Fiber

The American Heart Association recommends eating 25 grams of fiber per day[17]

You are taking in the recommended amount of fiber

Protein

The American Heart Association recommends eating 8-9 servings of protein per week[18]

Consider increasing your daily intake of high protein foods

Calcium

The USDA recommends consuming 2-3 cups of calcium-rich foods daily for adequate intake[15]

Increase your daily intake of calcium rich foods and consider adding a calcium supplement to your daily regimen

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Stress Hygiene

- **Cognitive-Behavioral Management**: Cognitive-behavioral stress management techniques such as relaxation techniques, cognitive restructuring, psychoeducation, and coping skills have been shown to be very effective at reducing stress[38]
- **Yoga:** Yoga has been shown to greatly reduce short-term anxiousness, perceived stress, and psychological distress[38]
- **Mindfulness**: Mindfulness as defined as nonjudgmental present-moment awareness that has been shown to significantly reduce stress when practiced daily[38]
- **Music Therapy**: Guided music therapy while listening to music meaningful to oneself has been shown to significantly reduce feelings of anxiousness[38]

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.
