NeuroScience Survey ID #1678869389

Requested for:

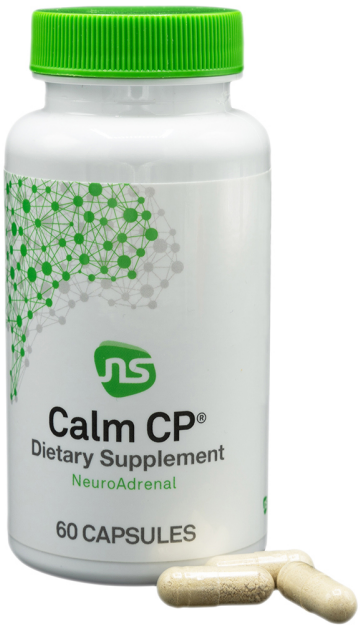
Name: **Michael P Kelly**
Sex: **male**
Age: **43**
State: **Georgia**

Your Score14

Your overall stress level is **14**, which indicates your stress level is **healthy**.

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.



Calm CP

Decreases cortisol levels and provides ingredients important for calm, sleep, and management of blood sugar*

- Decreases cortisol levels and provides ingredients important for calm, sleep, and management of blood sugar*
- Calm CP was recommended because you indicated you are perceiving elevated levels of stress
- Cortisol secretion follows a marked circadian rhythm and increases in response to stress through activation of the HPA axis35

Suggested use:
Take 2 capsules one to two times daily or as directed by your healthcare provider. Do not exceed suggested use.

If you are pregnant or nursing, consult your healthcare provider before use.

Fruits & Vegetables

You report consuming 3 to 5 servings per day

Essential Fatty Acids

You report consuming 2 to 3 servings per week

Fiber

You report consuming 3 or more servings per day

Protein

You report consuming 2 to 3 servings per day

Calcium

You report consuming 3 to 4 servings per day

Exercise

You reported that you are fairly active and/or workout occasionally

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Multivitamin

USDA recommends consuming 1-2 cups of whole fruits and 1-3 cups of vegetables per day[15]

Consider increasing your daily intake of whole fruits and vegetables

Fish Oil

The American Heart Association recommends eating 2 servings of omega-3 rich foods weekly[15]

Consider increasing your weekly intake of omega-3 rich food

Fiber

The American Heart Association recommends eating 25 grams of fiber per day[17]

You are taking in the recommended amount of fiber

Protein

The American Heart Association recommends eating 8-9 servings of protein per week[18]

Consider increasing your daily intake of high protein foods

Calcium

The USDA recommends consuming 2-3 cups of calcium-rich foods daily for adequate intake[15]

Consider increasing your daily intake of calcium
