NeuroScience Survey ID #1678927324

Requested for:

Name: **Kathleen Flores**
Sex: **female**
Age: **69**
State: **California**

Sleep area	Description	Rating
Self-Rated Sleep Quality	This is how you rate your sleep quality	★★
Ability to Fall Asleep	This is your body's ability to fall asleep	★
Ability to Stay Asleep	This is your body's ability to stay asleep through the night	★
Temperature Regulation	This is your body's ability to regulate temperature at night	★★★
Nighttime Discomfort	This is how you rate your nighttime discomfort	★
Daytime Fatigue	This is how you rate your sleepiness during the day	★★★★
Daytime Motivation	This is how you rate your motivation and energy to accomplish tasks during the day	★★

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Kavinace OS

Target the cellular consequences of sleeplessness with a formulation proven to significantly improve both sleep onset and efficiency after the first dose*

- Blend of ingredients proven to significantly improve both falling asleep and effectiveness after the first dose1*
- Recommended because you indicated your body's ability to fall asleep is very poor1

Suggested use:
Take 2 capsules at bedtime or as directed by your healthcare provider. Do not exceed suggested use.

If you are pregnant or nursing, consult your healthcare provider before use.

Calm CP

Decreases cortisol levels and provides ingredients important for calm, sleep, and management of blood sugar*

- Decreases cortisol levels and provides ingredients important for calm, sleep, and management of blood sugar9*
- Elevated cortisol has been associated with difficulty sleeping10
- Calm CP is a proven blend of ingredients that has been shown to decrease cortisol levels in as little as 5 days9

Suggested use:
Take 2 capsules one to two times daily or as directed by your healthcare provider. Do not exceed suggested use.

If you are pregnant or nursing, consult your healthcare provider before use.

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

CBD

- Cannabidiol (CBD) is a phytocannabinoid derived from hemp (*Cannabis sativa*) known to affect the body's endocannabinoid system which aids in supporting a healthy immune response and promoting feelings of calm[14*]
- The endocannabinoid system is important for regulatory functions in the body including supporting a healthy immune response and promoting calm[14]
- CBD was recommended because you indicated you experienced discomfort at night
