NeuroScience Survey ID #1681493231

Requested for:
Name: **Elaine Brooks**
Sex: **female**
Age: **73**
State: **Nevada**

Sleep area	Description	Rating
Self-Rated Sleep Quality	This is how you rate your sleep quality	★★
Ability to Fall Asleep	This is your body's ability to fall asleep	★★★
Ability to Stay Asleep	This is your body's ability to stay asleep through the night	★
Temperature Regulation	This is your body's ability to regulate temperature at night	★★★★
Nighttime Discomfort	This is how you rate your nighttime discomfort	★★
Daytime Fatigue	This is how you rate your sleepiness during the day	★★★★
Daytime Motivation	This is how you rate your motivation and energy to accomplish tasks during the day	★★

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

TravaCor

Contains a blend of ingredients shown to improve mood and reduce stress*

- Contains a blend of ingredients shown to improve mood and reduce stress*
- TravaCor was recommended because you indicated your ability to sleep through the night was poor or very poor
- TravaCor contains ingredients used in the body's creation of serotonin4*
- Serotonin is a neurotransmitter important for inducing sleep5

Suggested use:
Take 1-3 capsules one to two times daily or as directed by your healthcare provider.

If you are pregnant or nursing, consult your healthcare provider before use.

Multivitamin

USDA recommends consuming 1-2 cups of whole fruits and 1-3 cups of vegetables per day[15]

Consider increasing your daily intake of whole fruits and vegetables

Fish Oil

The American Heart Association recommends eating 2 servings of omega-3 rich foods weekly[15]

Consider increasing your weekly intake of omega-3 rich food

Fiber

The American Heart Association recommends eating 25 grams of fiber per day[17]

Consider increasing your daily intake of fiber-containing foods

Protein

The American Heart Association recommends eating 8-9 servings of protein per week[18]

Consider increasing your daily intake of high protein foods

Calcium

The USDA recommends consuming 2-3 cups of calcium-rich foods daily for adequate intake[15]

Consider increasing your daily intake of calcium

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Sleep Hygiene

- **Blue Light**: Reducing blue light exposure 2 hours before bed has been shown to improve sleep quality and total sleep time[19]
- **Exercise**: Regular exercise may improve sleep and is best completed several hours before bedtime[20]
- **Caffeine**: Limit caffeine intake several hours before bedtime as it can be disruptive on sleep[20]
- **Nicotine**: Nicotine is associated with sleep issues, contact your healthcare provider for further guidance on the use of nicotine products[20]
- **Alcohol**: While alcohol has been shown to help individuals fall asleep, it may prevent deep sleep and increase awakenings in the middle of the night[20]
- **Manage Stress**: Practice calming and relaxing techniques before bed as stress may contribute to difficulty sleeping[20]
- **Regular Sleep Times**: Practice going to bed at regular times to promote stable sleep and wakefulness[20]

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.
