NeuroScience Survey ID #1692217529

Requested for:

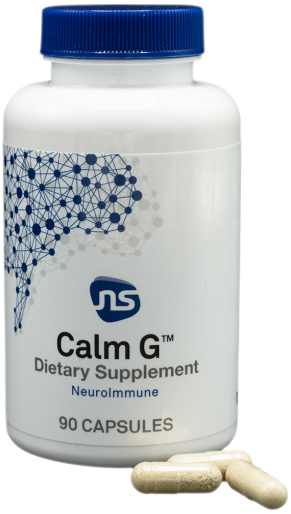
Name: **Jessica Williamson**
Sex: **female**
Age: **43**
State: **Connecticut**

Your Score13

Your overall stress level is **13**, which indicates your stress level is **healthy**.

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.



Calm G

Contains a blend of ingredients important for regulating glutamate activity, stress-reduction, metabolic health, and mitochondrial function*

- Contains a blend of ingredients important for regulating glutamate activity, stress-reduction, metabolic health, and mitochondrial health*
- Calm G was recommended to provide you with essential amino acids, vitamins, and minerals important for GABA and glutamate, two neurotransmitters that play large roles in anxiousness and stress39

Suggested use:
Take 1-2 capsules three to four times daily or as directed by your healthcare provider.

If you are pregnant or nursing, consult your healthcare provider before use.

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Fruits & Vegetables

You report consuming 0 to 2 servings per day

Essential Fatty Acids

You report consuming 0 to 1 servings per week

Fiber

You report consuming 2 to 3 servings per day

Protein

You report consuming 2 to 3 servings per day

Calcium

You report consuming 0 to 2 servings per day

Exercise

You reported that you are somewhat active and/or workout rarely

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Multivitamin

USDA recommends consuming 1-2 cups of whole fruits and 1-3 cups of vegetables per day[15]

Increase your daily intake of whole fruits and vegetables and consider adding a multivitamin to your daily regimen

Fish Oil

The American Heart Association recommends eating 2 servings of omega-3 rich foods weekly[15]

Increase your weekly intake of omega-3 rich food and consider adding a fish oil supplement to your daily regimen

Fiber

The American Heart Association recommends eating 25 grams of fiber per day[17]

Consider increasing your daily intake of fiber-containing foods

Protein

The American Heart Association recommends eating 8-9 servings of protein per week[18]

Consider increasing your daily intake of high protein foods

Calcium

The USDA recommends consuming 2-3 cups of calcium-rich foods daily for adequate intake[15]

Increase your daily intake of calcium rich foods and consider adding a calcium supplement to your daily regimen

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Stress Hygiene

- **Cognitive-Behavioral Management**: Cognitive-behavioral stress management techniques such as relaxation techniques, cognitive restructuring, psychoeducation, and coping skills have been shown to be very effective at reducing stress[38]
- **Yoga:** Yoga has been shown to greatly reduce short-term anxiousness, perceived stress, and psychological distress[38]
- **Mindfulness**: Mindfulness as defined as nonjudgmental present-moment awareness that has been shown to significantly reduce stress when practiced daily[38]
- **Music Therapy**: Guided music therapy while listening to music meaningful to oneself has been shown to significantly reduce feelings of anxiousness[38]

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.
