NeuroScience Survey ID #1743633509

Requested for:

Name: **Ponti Lambros**
Sex: **male**
Age: **53**
State: **California**

Stress Evalution

Your Score

31

Your overall stress level is **31**, which indicates your stress level is **high**.

***These statements have not been evaluated by the Food and Drug Administration.**

Recommendations and product information provided was requested by the user and is not intended to diagnose, treat, cure or prevent any disease.

Stress Product Recommendations

NeuroBiota

Shelf-stable probiotic blend important for the gut-brain axis, optimal mood, neurotransmitter synthesis, and balancing the immune response*

- ✓ Shelf-stable probiotic blend important for the gut-brain axis, improvement of mood, neurotransmitter synthesis, and balancing the immune response
- ✓ NeuroBiota was recommended because you indicated you experience digestive symptoms three or more times per week

Suggested use:
Take 1 capsule daily or as directed by your healthcare provider.
If you are pregnant or nursing, consult your healthcare provider before use.

TravaCor

Contains a blend of ingredients shown to improve mood and reduce stress to feel balanced*

- ✓ Contains a blend of ingredients shown to improve mood and reduce stress*
- ✓ TravaCor was recommended beause you indicated you are perceiving elevated levels of stress and reported feelings of upset or anger
- ✓ Low levels of serotonin have been correlated with feelings of upset or anger. TravaCor contains 5-HTP and B-vitamins important for the synthesis of serotonin in the body4,32

Suggested use:
Take 1-3 capsules one to two times daily or as directed by your healthcare provider.
If you are pregnant or nursing, consult your healthcare provider before use.
